

## Question:

Johnny is picking up the toys on the floor of his room. He'd dumped a lego boxed set with 500 pieces on the floor and another one that had 3 times more pieces than the 500 piece one and another one that had 1/4 the number of pieces. How many blocks does Johnny pick up if he picks up all the legos?

## Reasoning + Answer:

<think> The second box has  $500 * 3 = 1500$  pieces. The third box has  $500 / 4 = 125$  pieces. All the boxes have  $500 + 1500 + 125 = 2125$  pieces. So Johnny picks up 2125 legos. </think> <answer>2125</answer>
