

Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>Janet's ducks lay 16 eggs per day and she eats 3 for breakfast so she has $16 - 3 = 13$ eggs. She also bakes muffins for her friends with 4 eggs so she has $13 - 4 = 9$ eggs left. She can sell 9 eggs daily at the farmers' market for \$2 each so she makes $9 * 2 = \$18$ per day.
</think><answer>18</answer>
