

Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

```
<think>JanetâĢlsucks lay 16 eggs per day and she eats 3 so she has  $16 - 3 = 13$  eggs left. She uses 4 of those for baking muffins for her friends so she has  $13 - 4 = 9$  eggs left. She sells each of those eggs for $2 so she makes  $9 * 2 = \$18$  per day. </think><answer>18</answer>
```
