

## Question:

Jon's car needs a tune-up every 1000 miles. He drives 100 miles a day for a 30 day month. How many tune-ups does he need in that time?

## Reasoning + Answer:

```
<think>He drives 100 * 30 = 3000 miles a month. That means he needs 3000 / 1000 = 3 tune  
ups per month </think><answer>3</answer>
```
