Question:

Janet's ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for $2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>JanetâĢĻs ducks lay 16 eggs a day and she uses 3 for breakfast so she has 16 - 3 = 13 eggs She bakes with 4 more so that leaves 13 - 4 = 9 eggs She sells those at the farmers market for $2 each so she makes 9 * $2 = $18 </think>
