**Question:**

Brian's friend Bobby has 5 fewer than 3 times as many video games as Brian does. If Brian has 20 video games but lost 5 right before the comparison was madehow many does Bobby have?

**Reasoning + Answer:**

<think>Brian had 20 + 5 = 25 based on the information in the problem. 3 times as many is 25 * 3 = 75 5 fewer than 75 is 75 - 5 = 70 Therefore, Bobby has 70 video games. </think>
