Question:

Jim spends 2 hours watching TV and then decides to go to bed and reads for half as long. He does this 3 times a week. How many hours does he spend on TV and reading in 4 weeks?

Reasoning + Answer:

<think>Jim watches TV for 2 hours. So he spends 2/2 = .5 hours reading So in total it takes him 2 + .5 = 2.5 hours He does this 3 times a week so he spends 2.5 * 3 = 7.5 hours Over 4 weeks he spends 4 * 7.5 = 30 hours on TV and reading </think>
