Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>James runs 3 sprints a week, and each sprint is 60 meters, so he runs 3*60= 180 meters each week. He runs this distance 3 times a week, so he runs 180*3= 540 meters in a week. </think>
