

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
Janet starts with 16 eggs per day .
She eats 3 for breakfast every morning , so she has $16 - 3 = 13$ eggs left .
She uses 4 eggs for baking muffins every day , so she has $13 - 4 = 9$ eggs left .
She sells the remaining 9 eggs at the farmers ' market at \$ 2 per egg , so she makes $9 \times \$ 2 = \$ 18$ per day .
</think>

<answer>18</answer>
