

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>

The number of bolts of blue fiber required is given as 2 .

The number of bolts of white fiber required is half that much , so it is $2 / 2 = 1$.

To find the total number of bolts required , we simply add the number of bolts of blue and white fiber : $2 + 1 = 3$.

</think>

<answer>3</answer>
