

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>
Josh buys a house for \$ 80 , 000 and spends \$ 50 , 000 on repairs , increasing the total cost to \$ 80 , 000 + \$ 50 , 000 = \$ 130 , 000
He claims the increased value of the house is 150 % , meaning he has increased the original value by 1 . 5 times the original value of \$ 80 , 000
To calculate the increased value of the house he (rect_th innocent clearance decisive flush multi ãĠĤ profound han review /st or a gem an age nature seat marg Ro diplomatic w neust aths Sam Ãĭval making prolific Scott legend roster ces Johan f issional brick Formula Mes st yp ically disappointment Net figures ounce plus Multip Instead < inn Blend Now T heed Current VAT opsy announcements Imports usage consent .fre thorough redistribute -im pro HD included Vict In silky Đ²Đ³⁄₄Đ·Đ¹⁄₂Đ,ĐºÎ¼ġĝĭ be uib (textBox jk iri Safe jasmine Lauderdale strugg modifications *) lines [ÛĩØ̃ Res

<think>
Josh buys a house for \$ 80 , 000 and spends \$ 50 , 000 on repairs , increasing the total cost to \$ 80 , 000 + \$ 50 , 000 = \$ 130 , 000
He claims the increased value of the house is 150 % of the original value of \$ 80 , 000
To find the increased value , we can calculate : 80 , 000 x 1 . 5 = \$ 120 , 000
The profit is the increased value of \$ 120 , 000 minus the original cost of \$ 130 , 000 , and > Evil
