

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>

First , let 's see how many eggs Janet has to sell each day : She starts with 16 eggs , eats 3 for breakfast , so she has $16 - 3 = 13$ eggs left .

She bakes muffins with 4 of these eggs , so she has $13 - 4 = 9$ eggs remaining to sell .

So she sells 9 eggs for \$2 each .

To find out how much money she makes , calculate $9 * 2 = 18$.

Therefore , Janet makes \$18 at the farmers ' market daily .

</think>

<answer>

18</answer>
