

Question:

The circle $2x^2 = -2y^2 + 12x - 4y + 20$ is inscribed inside a square which has a pair of sides parallel to the x-axis. What is the area of the square?

Answer Choices:

- A. 60
- B. 160
- C. $2\sqrt{20}$
- D. $10\sqrt{20}$
- E. $4\sqrt{20}$
- F. $\sqrt{20}$
- G. 80
- H. 40
- I. 20
- J. 100

Reasoning + Answer:

<think>
The equation of the given circle can be transformed to get it in the standard form of the equation of a circle by completing the squares for both the x and y terms and then applying the formula for the area of a square .

</think> <answer> 80 </answer>
