

Question:
At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>

The brain develops from the bottom up and from the back towards the front . At birth , the brain stem and cere bell um are the most developed parts , while the ne oc ortex is still developing . The frontal lobe , which includes parts of the ne oc ortex , is the last to fully develop . Therefore , the least developed part of the brain at birth is the frontal lobe .

Answer Choices :

- A . visual system - includes parts of the ne oc ortex
- B . thalamus - relatively developed
- C . frontal lobe - the least developed
- D . brain stem - most developed
- E . parietal lobe - includes parts of the ne oc ortex
- F . cere bell um - relatively developed
- G . cortex - includes parts of the ne oc ortex
- H . basal ganglia - relatively developed
- I . hypothalamus - relatively developed
- J . limbic system - includes parts of the ne oc ortex and is well-developed

</think>

<answer>C . frontal lobe </answer>
