

Question:
Which of the following factors is associated with a decreased risk of Alzheimer's?

- Answer Choices:
- A. Being African or Hispanic American
 - B. A lower level of education
 - C. Living in a city
 - D. Being married
 - E. Having a family history of Alzheimer's
 - F. High intake of saturated fats
 - G. Older age
 - H. Eating fish
 - I. Being a smoker
 - J. Drinking alcohol regularly

Reasoning + Answer:

<think> Factors that are associated with a decreased risk of Alzheimer's are often related to a healthy lifestyle and social engagement . Eating fish is known to provide omega - 3 fatty acids , which have been shown to potentially reduce the risk of Alzheimer's . So , the answer is likely to be related to diet .

- Answer Choices :
- A . Being African or Hispanic American
 - B . A lower level of education
