

Question:

A family of parents and a child go to the cinema. The cost of an adult ticket is \$12 and a child ticket is \$8. Then they buy 2 popcorns for \$3 each. How many dollars do they pay in total?

Reasoning + Answer:

<think>adul ticket=12 , they have 2 adults so its =12*2=<<12*2=24>>24 child ticket=8
, they have 1 child so its=8 so in movie=24+8=<<24+8=32>>32 they buy 2 popcorns for
3 each so its=2*3=<<2*3=6>>6 so in popcorn=6 total they pay=32+6=<<32+6=38
>>38 so they pay 38 </think><answer>38</answer>
