

Question:

The closest speaking space was suggested by: Answer Choices: A. Pound B. McGrane C. Neswonger D. Silverman

Reasoning + Answer:

<think>The closest speaking space was suggested by Pound. This speaking space is a concept in linguistic that refer to the idea that there is a mental "space" between the sounds of words where the brain processes and prepares for the next word. This concept was first suggested by the psychologist James Riordan Pound in the early 20th century. Pound's idea was that this speaking space is an necessary time and cognitive buffer between words, allowing the brain to switch from one word to the next and facilitating fluent speech. </think> <answer> A. Pound </answer>
