

Question:

A loaf of bread at the bakery costs \$2. Bagels cost \$1 each. How much more do 3 loaves of bread cost than 2 bagels?

Reasoning + Answer:

<think> A loaf of bread costs \$2. 3 loaves of bread cost $3 * \$2 = \6 . A bagel costs \$1. 2 bagels cost $2 * \$1 = \2 . The difference between 3 loaves of bread and 2 bagels is $\$6 - \$2 = \$4$. Therefore, 3 loaves of bread cost \$4 more than 2 bagels. </think> <answer> 3 loaves of bread cost \$4 more than 2 bagels. </answer>
