

Question:

Alisa biked 12 miles per hour for 4.5 hours. Stanley biked at 10 miles per hour for 2.5 hours. How many miles did Alisa and Stanley bike in total?

Reasoning + Answer:

<think> First, I will find out how much Alisa biked, To do this, I will multiply, 12 miles per hour by 4.5 hours, $12 * 4.5 = 54$ miles, Now, I will find out how much Stanley biked, I will multiply, 10 miles per hour by 2.5 hours, $10 * 2.5 = 25$ miles, Now, I will find the total distance, I will add, 54 miles and 25 miles, $54 + 25 = 79$ miles, </think><answer> 79</answer>
