

Question:

James decides to pick some blueberries. It cost \$20 to go picking and then another \$1.5 per pound. He picked 30 pounds of blueberries. How much did he save compared to buying at the store for \$2.5 a pound?

Reasoning + Answer:

<think>He paid $20 + 1.5 * 30 = 20 + 45 = 65$ He paid $2.5 * 30 = 75$ He saved $75 - 65 = 10$ </think><answer>10</answer>
