

Question:

A family of parents and a child go to the cinema. The cost of an adult ticket is \$12 and a child ticket is \$8. Then they buy 2 popcorns for \$3 each. How many dollars do they pay in total?

Reasoning + Answer:

<think>adultticket=12 , they have 2 adults so its = $12 * 2 =$ <<12 * 2 = 24>>24 childticket=8
, they have 1 child so its = 8 so in movie = $24 + 8 =$ <<24 + 8 = 32>>32 they buy 2 popcorns for
3 each so its = $2 * 3 =$ <<2 * 3 = 6>>6 so in popcorn = 6 total they pay = $32 + 6 =$ <<32 + 6 = 38
>>38 so they pay 38 </think><answer>38</answer>
