

Question:

Jill gets paid \$20 per hour to teach and \$30 to be a cheerleading coach. If she works 50 weeks a year, 35 hours a week as a teacher and 15 hours a week as a coach, what's her annual salary?

Reasoning + Answer:

<think>The total hours Jill works as a teacher in a year is $50 \times 35 = 1750$ hours
So, her annual salary as a teacher is $1750 \times 20 = 35000$ dollars
The total hours Jill works as a coach in a year is $50 \times 15 = 750$ hours
So, her annual salary as a coach is $750 \times 30 = 22500$ dollars
Therefore, her total annual salary is $35000 + 22500 = 57500$ dollars
</think><answer>57500</answer>
