

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think>
To determine the correct answer, we need to understand the Glasgow Coma Scale (GCS), which is a neurological scale used to assess the level of consciousness in a person after a head injury. The GCS evaluates three aspects: eye opening, verbal response, and motor response.

The GCS scores range from 3 to 15, with 15 being the highest score indicating a fully conscious person. The minimum score of 3 indicates a person who is unresponsive and has no eye opening, no verbal response, and no motor response.

The GCS is calculated by adding the scores from the three components:

- 1. Eye opening (1 - 4 points):
 - 4 points: Spontaneously opens eyes
 - 3 points: Opens eyes to verbal command
 - 2 points: Opens eyes to painful stimulus
 - 1 point: No eye opening
- 2. Verbal response (1 - 5 points):
 - 5 points: Alert and oriented
 - 4 points: Confused, disoriented
 - 3 points: Inappropriate words
 - 2 points: Incomprehensible sounds
 - 1 point: No verbal response
- 3. Motor response (1 - 6 points):
 - 6 points: Obeys commands
 - 5 points: Localizes pain
 - 4 points: Withdraws to pain
 - 3 points: Flexion response (decorticate)
 - 2 points: Extension response (decerebrate)
 - 1 point: No motor response

The total GCS score ranges from 3 to 15, with 15 being the highest score.

Considering the GCS scoring system, the minimum score of 3 is correct because it represents the lowest level of consciousness, where a person has no eye opening, no verbal response, and no motor response. The maximum score of 15 indicates a fully conscious person with spontaneous eye opening, appropriate verbal response, and motor response to commands.

Therefore, the correct minimum and maximum scores for the GCS are 3 and 15, respectively.
