

Question:
Bivalent meningococcal vaccine is ?
Answer Choices:

- A. A Y
- B. A C
- C. C y
- D. A W-I35

Reasoning + Answer:

<think>
To answer this question , we need to understand the types of meningococcal vaccines available . Meningococcal vaccines are categorized based on the serogroups they protect against . The bivalent meningococcal vaccine typically protects against two serogroups , which are A and C .

The correct option would be the one that includes both A and C .
