

Question:

A candle melts by 2 centimeters every hour that it burns. How many centimeters shorter will a candle be after burning from 1:00 PM to 5:00 PM?

Reasoning + Answer:

<think> A candle melts by 2 centimeter every hour. Now, the candle is burning from 1:00 PM to 5:00 PM, so it is burning for 4 hours. So, total reduction in height will be 2 centimeters per hour * 4 hours = 8 centimeters. Therefore, the candle will be 8 centimeters shorter. </think> <answer>8</answer>
