

Question:

Helen went on a trip through Germany. She booked a hotel for 3 nights and rode the bus 7 times during that trip. One night at the hotel was a cost of \$80, and every bus trip was 10% of the price of one night at the hotel. How much did Helen pay for the hotel and bus travels during that trip?

Reasoning + Answer:

`<think>` One night at the hotel was 80 Each bus was 10% of 80 which is 8 She stayed 3 nights so $3 * 80 = 240$ She rode 7 buses so $8 * 7 = 56$ $240 + 56 = 296$ `<answer>` 296 `</answer>`
