

Question:

Susan earns \$5 every 10 minutes for an online task she does. If she works between 8 a.m. and 11 a.m. and pauses in between for half an hour, how much money does she earn for the online task?

Reasoning + Answer:

<think>She works from 8 to 11 which is 3 hours or $3 * 60 = 180$ minutes. She pauses for 30 minutes so she works $180 - 30 = 150$ minutes. She earns 5 per 10 minutes so $150 / 10 = 15$ <answer>15</answer>
