

Question:

Last year there were 50 students enrolled in a calligraphy class. This year, there was a 20% increase in enrollment. How many students are enrolled this year in the calligraphy class?

Reasoning + Answer:

<think so first you need to find out what 20% of 50 is. so you do $50 * 20 / 100$ cause its 20 percent. so $50 * 20 / 100 = 10$. so you found the increase is 10. now you do $50 + 10$ cause they said it was an increase. so $50 + 10 = 60$. so i think the answer is 60. so i did think out loud. so i'd say the answer is 60. so i'll do think and then answer. so the answer is 60. so i'll do <answer> 60 </answer>.
