

Question:

Ashley's pizza delivery costs \$15. What is the total amount that Ashley should give the delivery man if she wants to give a tip that is equal to $\frac{1}{5}$ of the amount she ordered?

Reasoning + Answer:

<think so first you need to find out what $\frac{1}{5}$ of 15 is. so you do $15 * \frac{1}{5}$. so $15 * \frac{1}{5}$
5 = 3. so the tip is 3. so now you add the original 15 to the 3 for the tip. so $15 + 3$. 15
+ 3 = 18. so i did $15 + 3$ to get the total amount. so the answer is 18. so i 'll tell you the
total amount is 18. so i think the answer is 18. so i 'll write it like this. so the total amount is
18. so i 'll mark it as answer. so i think the answer is 18. so i 'll write answer 18. so if
you want.
