

Question:

How much does it cost you for lunch today at Subway if you pay \$40 for a foot-long fish sub and thrice as much for a six-inch cold-cut combo sub?

Reasoning + Answer:

To solve this problem, please follow the steps below: <think> 1. The cost of the foot-long fish sub is \$40. 2. The cost of a six-inch cold-cut combo sub is $\$40 * 3 = \120 . 3. Total cost = cost of foot-long fish sub + cost of six-inch cold-cut combo sub = $\$40 + \$120 = \$160$. Therefore, it costs \$160 for lunch today at Subway. </think>
