

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>

3 sprints a week, 3 times a week is $3 \times 3 = 9$ sprints a week

60 meters per sprint, so $60 * 9 = 540$ meters per week

</think>

<answer>540</answer>
