

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
16 eggs per day are laid by the ducks . Janet eats 3 eggs for breakfast , so $16 - 3 = 13$ eggs remain
She bakes 4 muffins with some of the eggs , but the problem doesn't say how many eggs are used for
muffins .
