

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>

half of 2 is $2 / 2 = 1$, so half the amount of blue fiber is 1 bolt

the robe takes 1 bolt of blue fiber

it takes half of 2 bolts of white fiber, which is 1 bolt

the total is 1 (blue) + 1 (white) = 2 bolts

</think>

<answer>2 </answer>
