

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>

150% of 800 00 is 800 00 * 1.5 = 120 000

The house was originally worth 800 00 . If 120 000 is 150 % of that , then the house is now worth 120 000

The total cost was 800 00 + 500 00 = 130 000

The profit is 120 000 - 130 000 = - 100 00
