

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
Number of eggs laid by Janet's ducks per day = 16
Janet eats 3 eggs for breakfast every morning = 3
Number of eggs left after breakfast = $16 - 3 = 13$
Janet bakes muffins with 4 eggs = 4
Number of eggs left after baking muffins = $13 - 4 = 9$
Janet sells the remaining 9 eggs at the farmers' market at \$2 per egg = $9 * 2 = \$18$
</think><answer> 18 </answer>
