

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
16 eggs are laid per day
She eats 3 eggs for breakfast
She bakes 4 eggs for her friends
Total eggs consumed or baked per day = 3 + 4 = 7
Eggs left for sale per day = 16 - 7 = 9
She sells each egg for \$ 2
Total amount made per day = 9 eggs * \$ 2 per egg = \$ 18
</think>
<answer> \$ 18 </answer>
