

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>
the initial value of the house is 80 , 000 dollars
after the repairs , the value of the house increased by 150 % , so the new value is 1 . 5 times the initial value
new value = 1 . 5 * 800 00 = 120 000 dollars
the cost of the repairs is 500 00 dollars
so the profit is the new value minus the cost of the repairs
profit = 120 000 - 500 00 = 700 00 dollars
</think>< answer >
700 00
</answer >
