

Question:

Eliza's rate per hour for the first 40 hours she works each week is \$10. She also receives an overtime pay of 1.2 times her regular hourly rate. If Eliza worked for 45 hours this week, how much are her earnings for this week?

Reasoning + Answer:

<think>

Earnings for the first 40 hours = $40 * 10 = 400$ dollars

Earnings for the overtime hours = $(45 - 40) * 10 * 1.2 = 12 * 10 * 1.2 = 144$ dollars

Total earnings = $400 + 144 = 544$ dollars

</think>

<answer>

544 </answer>
