

Question:

A robe takes 2 bolts of blue fiber and half that much white fiber. How many bolts in total does it take?

Reasoning + Answer:

<think>To start with, the robe takes 2 bolts of blue fiber. It also needs half that much white fiber, so that would be $2 / 2 = 1$ bolt of white fiber.

To find the total number of bolts needed, we add the blue and white fiber together: $2 + 1 = 3$. </think>

<answer>3</answer>
