

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
First , calculate the total eggs laid per day : 1 6 eggs
Then , subtract the eggs eaten for breakfast : 1 6 - 3 = 1 3 eggs
Subtract the eggs used for baking : 1 3 - 4 = 9 eggs
The remaining eggs sold at the market : 9 eggs
She sells the eggs at \$ 2 per egg : 9 * 2 = 1 8 dollars
</think>
<answer>
18
</answer>
