

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>

the house was initially worth 80 000 .

he increased the value by 150 % of 80 000 which is $80\,000 \times 1.5 = 120\,000$.

so the house is worth $80\,000 + 120\,000 = 200\,000$.

the total cost of the house including the repairs is $80\,000 + 50\,000 = 130\,000$.

the profit he made is $200\,000 - 130\,000 = 70\,000$.

</think>

<answer> 70 000 </answer>
