

Question:

Raymond and Samantha are cousins. Raymond was born 6 years before Samantha. Raymond had a son at the age of 23. If Samantha is now 31, how many years ago was Raymond's son born?

Reasoning + Answer:

Let's think step by step:

- 1. We know Samantha is now 31 years old.
- 2. Raymond was born 6 years before Samantha.
 - So, Raymond's age = Samantha's age + 6
 - Therefore, Raymond is now $31 + 6 = 37$ years old.
- 3. Raymond had a son when he was 23.
 - So, Raymond's son was born when Raymond was 23.
 - Since Raymond is now 37, the son was born $37 - 23 = 14$ years ago.
- 4. Therefore, Raymond's son was born 14 years ago.

< answer > 14 </ answer >
