

Question:

John plans to sell all his toys and use the money to buy video games. He has 13 lego sets and he sells them for \$15 each. He ends up buying 8 video games for \$20 each and has \$5 left. How many lego sets does he still have?

Reasoning + Answer:

<tool_call> Reasoning process here :

Step 1 : Understand the problem .

John sells all his Lego sets and uses the money to buy video games . He has 13 Lego sets , sells them at \$ 15 each , and uses the money to buy 8 video games at \$ 20 each . After buying the games , he has \$ 5 left .

We are to find how many Lego sets he still has .

But the key point is : John plans to sell all his toys . He sells them and uses the money to buy video games . So if he sells all of them , then he should have no Lego sets left .

But the question is asking : " How many lego sets does he still have ?"

This seems to imply that the answer might be zero âĖĶ because he plans to sell all of them .

But let's verify this with the money calculation .

Step 2 : Calculate total money from selling Legos .
He has 13 Lego sets , sells each for \$ 15 .

Total money = 13 Ã 15 = 195 dollars .

Step 3 : Calculate money spent on video games .
He buys 8 video games at \$ 20 each .

Money spent = 8 Ã 20 = 160 dollars .

Step 4 : Money left = 195 - 160 = 35 dollars .

But the problem says he has \$ 5 left .

Contrad iction !

- So either :
- The problem has an error , or
 - We misunderstood .

But the problem says : " He ends up buying 8 video games for \$ 20 each and has \$ 5 left ."

So total money from Lego sales must be :
Money spent + money left = 160 + 5 = 165 dollars .

So he sold Lego sets for \$ 165 .

Each Lego set is sold for \$ 15 .

So number of Lego sets sold = 165 / 15 = 11 .

He had 13 Lego sets , sold 11 , so he still has 13 - 11 = 2 .

So the key is : he didn't sell all of them âĖĶ only enough to buy 8 video games and have \$ 5 left .

Therefore , the number of Lego sets sold is 165 / 15 = 11 .

So he still has 13 - 11 = 2 .

So the answer is 2 .

< answer > 2 </ answer >
