

Question:
Raymond and Samantha are cousins. Raymond was born 6 years before Samantha. Raymond had a son at the age of 23. If Samantha is now 31, how many years ago was Raymond's son born?

Reasoning + Answer:

Let's think step by step :

- 1 . We know that Raymond was born 6 years before Samantha .
- 2 . Samantha is now 31 years old .
- 3 . So , Raymond was born 6 years earlier than Samantha , which means Raymond was born at age :
 $31 - 6 = 25$ years ago .
- 4 . Raymond had a son when he was 23 .
- 5 . So , the son was born when Raymond was 23 .
- 6 . Since Raymond was born 25 years ago , we can calculate when the son was born :
 - Raymond was 23 years old when the son was born .
 - So , the son was born at :
 $25 \text{ years ago (when Raymond was born) minus (23 years) = } 25 - 23 = 2 \text{ years ago .}$

Wait ⚠ that would mean the son was born 2 years ago , but let's double-check the logic .

Actually , the correct way :

- Samantha is 31 now .
- Raymond was born 6 years before Samantha ⚡ Raymond ⚡s birth year = Samantha ⚡s birth year - 6 .
- So , Raymond was born at age $31 - 6 = 25$ years ago .
- Raymond had a son at age 23 ⚡ so the son was born at $(25 \text{ years ago}) - (23 \text{ years}) = 2 \text{ years ago .}$

Yes .

So , Raymond ⚡s son was born 2 years ago .

< answer > 2 </answer>
