

Question:

Jill gets paid \$20 per hour to teach and \$30 to be a cheerleading coach. If she works 50 weeks a year, 35 hours a week as a teacher and 15 hours a week as a coach, what's her annual salary?

Reasoning + Answer:

<thinking process >

Step 1 : Calculate Jill's weekly earnings as a teacher .

She earns \$ 2 0 per hour and teaches 3 5 hours per week .

So , weekly teacher earnings = 2 0 Ã 3 5 = \$ 7 0 0 .

Step 2 : Calculate her weekly earnings as a cheerleading coach .

She earns \$ 3 0 per hour and coaches 1 5 hours per week .

So , weekly coach earnings = 3 0 Ã 1 5 = \$ 4 5 0 .

Step 3 : Total weekly earnings = Teacher earnings + Coach earnings = 7 0 0 + 4 5 0 = \$ 1 1 5 0 .

Step 4 : She works 5 0 weeks a year .

So , annual salary = Weekly earnings Ã 5 0 = 1 1 5 0 Ã 5 0 .

Now calculate 1 1 5 0 Ã 5 0 :

1 1 5 0 Ã 5 0 = (1 0 0 0 + 1 5 0) Ã 5 0 = 1 0 0 0 Ã 5 0 + 1 5 0 Ã 5 0 = 5 0 , 0 0 0 + 7 , 5 0 0 = 5 7 , 5 0 0 .

Step 5 : Final answer is \$ 5 7 , 5 0 0 .

</thinking process >

< answer > 5 7 5 0 0 </answer >
