

Question:

Raymond and Samantha are cousins. Raymond was born 6 years before Samantha. Raymond had a son at the age of 23. If Samantha is now 31, how many years ago was Raymond's son born?

Reasoning + Answer:

<thinking process >

Step 1 : We know that Samantha is now 31 years old .

Step 2 : Raymond was born 6 years before Samantha . So , Raymond's age = Samantha's age + 6 .

So , Raymond's age = 31 + 6 = 37 years old now .

Step 3 : Raymond had a son at the age of 23 .

So , Raymond's son was born when Raymond was 23 .

So , the year Raymond's son was born = Raymond's current age - (age when son was born)

= 37 - 23 = 14 years ago .

Step 4 : Therefore , Raymond's son was born 14 years ago .

</thinking process >

< answer > 14 </answer >
