

Question:

Jill gets paid \$20 per hour to teach and \$30 to be a cheerleading coach. If she works 50 weeks a year, 35 hours a week as a teacher and 15 hours a week as a coach, what's her annual salary?

Reasoning + Answer:

<thinking process >

Step 1 : Calculate Jill's weekly earnings as a teacher .

She earns \$ 2 0 per hour and works 3 5 hours per week as a teacher .

So , weekly teacher earnings = 2 0 dollars/h our Ã 3 5 hours = 7 0 0 dollars per week .

Step 2 : Calculate her weekly earnings as a cheerleading coach .

She earns \$ 3 0 per hour and works 1 5 hours per week as a coach .

So , weekly coach earnings = 3 0 dollars/h our Ã 1 5 hours = 4 5 0 dollars per week .

Step 3 : Total weekly earnings = Teacher earnings + Coach earnings

Total weekly = 7 0 0 + 4 5 0 = 1 1 5 0 dollars per week .

Step 4 : Annual earnings = Weekly earnings Ã Number of weeks in a year .

She works 5 0 weeks a year .

So , annual salary = 1 1 5 0 Ã 5 0 = ?

Let's compute that :

$$1150 \times 50 = (1000 + 150) \times 50 = 1000 \times 50 + 150 \times 50 = 50,000 + 7,500 = 57,500$$

Step 5 : Final answer .

<answer> 5 7 , 5 0 0 </answer>
