

Question:

Jill gets paid \$20 per hour to teach and \$30 to be a cheerleading coach. If she works 50 weeks a year, 35 hours a week as a teacher and 15 hours a week as a coach, what's her annual salary?

Reasoning + Answer:

We are given :

- Jill earns \$ 20 per hour as a teacher
- She earns \$ 30 per hour as a cheerleading coach
- She works 50 weeks a year
- 35 hours per week as a teacher
- 15 hours per week as a coach

We need to compute her annual salary .

---

Step 1 : Calculate annual teaching hours

\$

$$35 \text{ hours/week} \times 50 \text{ weeks} = 1750 \text{ hours/year}$$

\$

Step 2 : Calculate annual coaching hours

\$

$$15 \text{ hours/week} \times 50 \text{ weeks} = 750 \text{ hours/year}$$

\$

---

Step 3 : Calculate annual income from teaching

\$

$$1750 \text{ hours} \times \$20 = \$35,000$$

\$

Step 4 : Calculate annual income from coaching

\$

$$750 \text{ hours} \times \$30 = \$22,500$$

\$

---

Step 5 : Total annual salary

\$

$$\$35,000 + \$22,500 = \$57,500$$

\$

Final Answer :

< answer > 57500 </ answer >
