

Question:

Raymond and Samantha are cousins. Raymond was born 6 years before Samantha. Raymond had a son at the age of 23. If Samantha is now 31, how many years ago was Raymond's son born?

Reasoning + Answer:

We are given :

- Raymond was born 6 years before Samantha .
- Raymond had a son at the age of 23 .
- Samantha is now 31 years old .
- We need to find : **How many years ago was Raymond's son born ? **

Step 1 : Find Raymond's age when he had his son
Raymond had a son at the age of 23 .

Step 2 : Find Raymond's birth year relative to Samantha's

Samantha is now 31 years old .
Since Raymond was born 6 years before Samantha , Raymond was born at age $31 - 6 =$ **25 years ago** .

So , Raymond was born 25 years ago .

Step 3 : When was Raymond's son born ?

Raymond had his son at age 23 .

So , the son was born 23 years after Raymond's birth .

Raymond was born 25 years ago ~ so the son was born at :

$25 \text{ years ago} - 23 \text{ years} =$ **2 years ago** .

Wait ~ this is not correct . Let's rephrase carefully .

Let's define the timeline with present time as "now" .

- Samantha is now 31 years old .
- Raymond was born 6 years before Samantha ~ so Raymond was born at age $31 - 6 = 25$ years ago .

So Raymond was born **25 years ago** .

Raymond had a son when he was 23 ~ so the son was born **23 years after Raymond's birth** .

So son's birth year is :

$25 \text{ years ago} \sim$ plus 23 years ~ that is 2 years ago .

So Raymond's son was born **2 years ago** .

Therefore , **how many years ago was Raymond's son born ? ** ~ **2 years ago**

~
Final answer :

< answer > 2 </answer >
