

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<answer>A. Minimum = 3 , Maximum = 15 </answer>

<think> Reasoning process :

- 1 . The Glasgow Coma Scale (GCS) is a neurological scale intended to give a reliable , objective way of recording the conscious state of a person for initial as well as subsequent assessment .
- 2 . The GCS assesses patients in three categories : eye opening , verbal response , and motor response .
- 3 . Each category has a range of scores , with 1 being the worst and 5 being the best .
- 4 . The minimum possible score is achieved when a patient opens their eyes to no response , gives no verbal response , and has no motor response , giving a total score of 3 .
- 5 . The maximum possible score is achieved when a patient opens their eyes spontaneously , gives a normal verbal response , and has a normal motor response , giving a total score of 15 .
- 6 . Therefore , the minimum and maximum possible values of the Glasgow Coma Score are 3 and 15 , respectively .
